British and Dominion Premiers To Confer on Disarmament

Meeting in London May Postpone Indefinitely Return of Premier Meighen to Canada.

London.—It is believed that the idea of holding a preliminary disarmament conference was originally proposed by Wm. Morris Hughes, premier of Australia, and Wm. F. Massey, premier of New Zealand, who will be unable to go to the United States during the autumn owing to the convening of their respective parliaments. A London conference is supposed also to have been strongly favored by Japan.

Instead of the proposed preliminary conference, there will be held here a conference between the British cabinet ministers and the Dominion premiers. For this purpose, Premier Meighen of Canada has postponed indefinitely his idea of sailing for home.

This conference will be devoted first to a discussion of the policy and representations of the British Empire at the Washington conference, and second, to the advisability of asking the Washington Government to postpone the disarmament and Pacific conference to some later date than Nov. 11.

Such a postponement would not only be agreeable to the Dominion premiers, who will be unable to be in Washington in November, but it would be convenient to the British Government because, in the event of Irish negotiations proving successful, it might become necessary to hold an autumn session of parliament to legislate for a new Irish settlement.

To Prosecute

Income-Tax Defaulters

Many Have Not Complied With Law In Making Necessary Returns.

Ottawa.—Extensive prosecutions all over the country are about to be instituted by the taxation branch of the finance department against those who have failed to make returns of income as provided by the Income Tax Act. While the number making returns this year is very much greater than before, and with much less suspicion of fraud and concealment, there are thousands who have not complied with the act at all, and evidently plan to escape the taxation which applies to all with income in excess of the statutory exemption.

The department, having returns from employers, has a good idea of those who are assessable, and it is not a difficult proposition to check and see if they have made returns. There are others who are not employed by companies or firms, but rather are in business for themselves or living in ease, and it is not hard to get at this class either. The prosecutions for false returns initiated last year have had a salutary effect and have led to a greater accuracy. This year there are comparatively few cases of this score, but a great number who have ignored the law completely. The penalty is \$25 for each day of default.

Bodies Of Fallen

Soldiers Removed

Claim Many Canadian Graves in France and Flanders Are Empty.

London.—The Daily Express makes a sensational statement respecting Canadian bodies on the battlefields of France and Belgium. According to this paper, one of the startling allegations made by a responsible Canadian Government official working on the War Graves Commission is re-interment in the dead that "many graves in the Great War cemeteries of Flanders and France marked with the names of fallen soldiers are in fact empty of remains."

The Canadian officer declared to the Daily Express representative: "There is a cemetery at Hooge, which has a whole line of empty graves, although each is marked with a cross and relatives and friends of the fallen have actually been in the cemetery when graves have been opened and found nothing. Their distress has been beyond imagination."

This officer says there appears to be a lack of supervision of the general work and in proof he relates how a wealthy Canadian from the West, on being denied the removal of his son from a cemetery in Flanders, managed to get two men to dig up the body at midnight and the remains were shipped across the Atlantic from Antwerp. One of the men engaged is understood to have been concerned in other cases of removal.

Byng Accepts Invitation.

Ottawa.—Lord Byng of Vinny has accepted an invitation of the Association of Canada Rifle Association to attend a luncheon at their annual prize meeting, on August 19, on the Connaught ranges.

Final Returns Give Farmers Total of 39 Seats.

Edmonton.—Final returns from Clearwater indicate the election of Dr. State, Liberal, by a majority of 85 over O. T. Lee, Independent-Liberal, and 100 over Robt. Campbell, Independent.

F. Fedun, Farmer, wins in Victoria by 39 majority over Frank Walker, Liberal.

D. F. Muir, Farmer, is elected in Leduc, and W. J. Joly, Farmer, in St. Paul.

The standing of the parties is now: U.F.A., 39. Liberals, 14. Independents, 4. Labor, 4.

More Work In Railway Shops

Increased Hours of Work Effecting Many Workers in Winnipeg

Winnipeg.—An increase from 24 to 36 hours a week affecting nearly 6,000 men employed in car, locomotive and repair shops in Western Canada by the Canadian National Railways was announced here. The new hours go into effect immediately. The reduced hours have been in force during the last six months.

The Canadian Pacific Railway shops are now working a straight five days a week with the expectation that they will go on full time next month.

Prince May Visit Japan Next April.

London.—Japan's invitation to the Prince of Wales to visit Japan at the conclusion of his Indian tour has not yet been officially accepted. It is understood, however, that the King approves of the visit and that the Prince will go to Japan March or April, 1922.

Census Work Nearly Finished

Ottawa.—While the great bulk of Canada's population census has now been taken, no definite figures may be published for another month, and it may be November before the population for the Dominion is officially announced. In the meantime much has to be done in the way of revision. The census branch is receiving a large number of reports from individuals who complain of having been overlooked.

Oilfields On Fire

Fire Is Raging in the Amatlan, Mexico.

Mexico City.—The Amatlan oilfields are on fire, with drilling towers falling like shafts and the workmen fleeing, according to reports received here describing "the greatest catastrophe in the history of the world's oilfields." The cause of the fire is not known.

Financial losses cannot be estimated, say the advisors, which add that the conflagration dwarfs into insignificance the Pordro Del Llano conflagration.

Columns of fire hundreds of feet high are covering the field, it is declared, which is hundreds of acres in extent, and efforts to suppress the blaze are said to be considered hopeless.

To Build Houses for Workmen.

Montreal.—Work is immediately to be begun in the city of a programme that calls for 1,500 substantial brick houses for workmen.

A corporation composed largely of business men who feel that the housing shortage is handicapping the industrial progress of the city, will finance the project. Workmen will be encouraged to buy houses.

Early Days In The Hudson's Bay Service

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

(Continued)

Stopping for a few minutes in the lee of the land we held another council. The wind had increased and white caps were beginning to show on the lake, also the wind which had been fair would now be on our broadside and the boat was light. Then again to weather the point our course must be south in place past. After some discussion I decided to go on, and we placed a few stones in the bow of the boat for ballast. Then, putting two reefs in the sail, we sailed out close-hauled and found, alas, we made some leeway, there being not enough cargo on board to trim her properly. Still, by shifting the passengers midships and I in the bow, the boy at the sheet, old Antoine steering, we thought though close enough, if the wind held steady we could make it. I forgot to mention that we had unshipped the big sweep in the morning and were now steering by rudder.

Occasionally spray would break over the boat and this seemed to excite our Scotchman who got his arms twisted in the sheet and nearly went overboard. I sat him down rather roughly on the thwart and told him not to stir, but when I went forward, bearing a shout from the boy, he was at the sheet again and within an ace of going over the side. We lost some ground here as Antoine was watching the antics of his loney; so yelling to keep her up to the wind, I fetched Mr. Scotty a crack on the head with a square tiller, and down he went, quiet enough. This alarmed the little girls and they began to cry; also they were seasick as the wind was getting heavier, at times the boat showing half her keel. We were nearing the end of the point and the surf was breaking over the rocks to some distance out. It was an anxious time for me, and I told Antoine and the boy to take a child apiece if we struck, and I would help the wife and baby, or rather youngest child who was about six, I should think. The Scot would have to help himself, as he was now sitting in the bottom of the boat looking very stupid. Then stretching along the bow I watched keenly for rocks, a wave of the hand guiding the steersman. For twenty minutes we were in considerable danger and the noise of the surf was deafening. One could have clucked a biscuit on the rocks from the boat, and old Antoine said it was only our light draught saved us. Round the point we went into a beautiful little bay, the shores of which were lined with cedar (the only place they show in the whole course of the river) and landing the whole party had a good rest and wash, even Scotty behaving more rationally than usual.

It was now again fair wind and shaking the reefs out of our sail away we went for Grand Rapids, the wind blowing half a gale behind us. Never was better time than had, and Cross Lake, though six miles in width, was crossed in a few minutes. Then on we went, tearing for the head of Grand Rapids itself where the upper post was situated. I could recognize the tall form of my friend and mentor, Alex. Matheson, anxiously pacing the shore and staring at our boat which was coming along at a tremendous speed, favored both by wind and current. He was at that time in charge of all steamboat transport. Antoine held her well and we kept full sail up to the last minute, then dropped the yard and ran the bow of the old boat a foot into the bank. Poor Matheson was shaking his head and saying, "Ah, Lord B. (his nickname for me), I was sure it was you, no one else would be reckless enough to run those rapids under full sail."

Glad I was to land my party, and I expect the trip would linger long in the memory of Mrs. Missionary and her little girls. Fortunately the Str. Colwill was not expected until next day so we had plenty of time to recover from the effects of our journey. For the information of modern readers I might state the Grand Rapids are situated at the mouth of the Saskatchewan River where it enters Lake Winnipeg. There is a continuous rapid for over three miles, in which there are three drops over rocky ledges. The rapids can be run easily by experienced hands, and accidents can happen just as easily when the passage is undertaken by tenderfeet. The Hudson's Bay Company had two of their best river steam haulers on these rapids by the help of many men and the nigger engines on the boats. These were the Nor-West and the Northcoast. The Marquis was the largest boat, but rather too heavy for the rapids. A steel steamer called the Lily was tried for the navigation of the South Branch, but proved a failure. She was modelled on the plan of the African and Indian river boats, but did not work out on western rivers.

A steel tramway was laid by the H. B. Co. across the Portage and mule power was used to transport the freight from the lower warehouse to the large establishment at the head of the rapids. This still remains, but I believe is no longer used. Myself and passengers all went aboard the Colwill next day, and the poor Scotch laddie, after a medical examination, was sent to the asylum for a few months. After seven years in the west I had been granted a year's furlough, and accompanied the valuable cargo of furs as far as St. Paul, these having come in by our steamer. We ascended the Red River by steamer party by train to St. Paul. Taking a receipt for the furs I booked by the lake route east, sailing from Duluth and thence by water through the great lakes, down the rapids of the St. Lawrence out in the gulf to Gaspé-B.-J., where my people were living at that time.

Winnipeg Housing Scheme

Winnipeg.—The city of Winnipeg under the post-war housing relief fund will have advanced a total of \$1,435,000 for construction of 356 dwellings when the 1921 building season comes to an end November 1, a representative of the housing commission announced. Most of the dwellings will be occupied by regularly constituted taxpayers of the city. The houses are constructed according to standard specifications and are inspected carefully while under construction.

Red Cross Subscriptions.

London.—A report issued by the British Red Cross Society shows that during the war the public subscriptions were £16,500,000 in cash, and contributed stores to the value of £1,000,000.

Commission Gets Recess.

Ottawa.—No sittings of the Railway Commission are scheduled for the remainder of July and the month of August. The next will probably be the regular sitting in Ottawa on the second Tuesday of September.

McMillan Expedition To North

Hope to Winter in Latitude Where No Boat Has Been for Hundred Years.

Halifax.—"We hope to winter in Fury and Hecla Straits, seventy degrees north latitude where no ship has been for one hundred years," said Prof. Donald B. MacMillan, in an interview on board his exploration ship Bowdoin, en route to the far north to explore one thousand miles of unknown coast line on the western shores of Hudson Bay. The Bowdoin stated Prof. MacMillan, is one of the smallest ships that have ever travelled north. The last expedition was made by Captain Parry, a British naval officer, who was in search of a northwest passage. His men went down with scurvy and his two ships, the Fury and the Hecla, whose names were given to the straits they discovered, were forced to return to England. No ship has ever been through the Fury and Hecla straits, and the Bowdoin was built smaller in order to navigate them.

Spending your money at home, thereby helping your own town and local merchants.

Marvelous Results That Have Attended Experiments In The Selection Of Seed

An interesting series of botanical experiments has been conducted by Luther Burbank, who announces that he has proved that Indian corn originates in a wild grass called teosinte. This teosinte was surmised by botanists to be the wild ancestor of the corn crops, the theory being that it had been evolved from its wild state into maize by the Indians; but whereas the Indians took many centuries to do their selection, Burbank, working on scientific methods, has done the work in the short period of eighteen years. On his experimental farm in California he has growing both the perfected ears of Indian corn and the wild grass "slightly less in length than an average head of wheat" from which the corn was raised. A remarkable example of the potency of plant selection.

Burbank simply did in a few years the few obvious things which it took the savage mind centuries to perceive. He "cultivated" the wild grass and raised his successive crops from selected seed. The great principle of variation was a closed book to the Indians, but it is the principle upon which horticulturists and stock raisers have been working for many years, and this latest triumph of the California plant wizard's draws attention once more to the profound consequences which "selection" has had on living forms. By taking selected grains from the teosinte grass and using them for seed, Burbank was able to obtain a plant which produced a cob covered by grains of corn enclosed in pods. By taking grains of this "pod corn" which were bursting out of the pod, and using them as seed, he was able to obtain the podless corn on cob familiar to everybody. By selecting his desired variety and eliminating the undesired, teosinte grass became Indian corn in eighteen years, yet who, looking at an ear of teosinte and an ear of Indian corn would even dream that the one was directly related to the other?

The beneficial results of selection are widely appreciated by farmers everywhere in so far as improving the staple varieties of grain are concerned. Wheat, oats and the other cereals are well known now to be grown from improved strains—the wheat of today is a better wheat than that of fifty years ago; but Burbank's experiments with the teosinte grass goes far beyond selection of improved varieties of a type he has evolved one form from another; he has uncovered the operations of the subtle processes by which types themselves change into other types; the most significant thing of all in evolutionary development.—Manitoba Free Press.

Marne Victory Won By Wireless

Station in Eiffel Tower Caught Messages From Germans.

General Ferré had been awarded 100,000 francs by the Institute of France for the development of a wireless station in Eiffel Tower. The station permitted the French to win the Marne victory in September, 1914, by copying messages sent through field quarters by the German armies streaming into Belgium, France, Berlin and the war department.

Eiffel Tower "listened in" on General von Marwitz' communications stating the disposition of German infantry, cavalry, artillery, amount of ammunition available, and stating soldiers were starving and horses lacked shoes. Ferré notified General Gallieni, resulting in the tactical army against von Kluck's right flank.

She Didn't Know Everything. "Bobby, your mother tells me you are a very bright boy, and she expects you to be a great man," said Mr. Blossom as he sat in the parlor waiting for Bobby's sister.

"Ma never does 'speak right," She doesn't know what she's talking about. She told dad she 'spected you and my sister would be married 'fore spring, and that was more than a year ago."—Houston Post.

W. N. U. 1378

Why Voyages Of Discovery Pay

Increase Store of Knowledge and Make World Richer.

The announcement that Sir Ernest Shackleton will soon start on another voyage of discovery raises the old question, "What is the use of such voyages?" Judged by the standard of dollars and cents, the balance would seem to tip against such adventures. The geographers will add to their store of knowledge, oceanographers who study tides and currents will, no doubt, be able to test and confirm some of their theories, the geologist, the naturalist and the meteorologist will add something new to the world store of lore. Directly, the expedition will not put a dollar into anyone's pocket and it will take a good many dollars out of the pockets of others. The men who accompany Shackleton will not be paid high salaries, they will make the journey largely for the love of adventure and the honor will be the accomplishment of deeds of high daring, involving physical suffering, and the risk of death always bring.

Judged by the gold standard, the expedition may perhaps be voted a sheer waste of time and money. Gauged by the amount by which our store of knowledge will be increased, the returns may be out of all proportion to the amount expended. Yet there are other standards and other measures of value. The finding of the North and South Poles, the climbing of hitherto inaccessible peaks, and the penetration of jungles and deserts that have hitherto defied human desire is a triumph for the whole of mankind, and especially for the race to which the adventurers belong. It is another milestone in the conquest of man over Nature, a victory won by organization, ingenuity and dogged pluck over the obstacles which Nature sets in man's path. These journeys give man an increased pride and confidence in himself.

The world would be poorer today if Scott had not gone on his last great voyage; for the most stirring epic in romantic adventure would never have been written.

Increase In Dairy Products

Now In Operation Throughout the Dominion 3,165 Dairy Factories.

An increase of \$9,000,000 in dairy products for 1920 over those for the previous year is reported by the Dominion Bureau of Statistics. Creamery butter in 1920, with an output of 110,030,399 pounds showed an increase of 6,139,692 pounds over 1919, with an average price secured of 56 1/2 cents per pound as against 54 cents. Cheese made in factories during 1920 aggregated 149,521,008 pounds. There were in operation throughout the Dominion 3,165 dairy factories, with a capitalization of \$32,767,317 with 11,211 employees and a total paid in wages of \$8,776,676.

Bumper Crops.

Crops in Saskatchewan. Saskatchewan was the best in twenty years, says E. B. Johnson, of Maryfield, Saskatchewan—one of the leading farmers and business men of that part. He declared that they surpassed the crops of 1915, and to say that they are simply magnificent does not give an appreciable idea of their appearance, he stated. Wheat is long in the head, while it is nothing unusual to see nine heads on a stalk, and this was seldom been seen in serious years, Mr. Johnson reported.

Grain To Old Countries.

Grain shipments this season via the port of Montreal have so far been almost double those of last year. Over 20,000,000 bushels have gone abroad to Britain, Italy and Holland. Indications point to Montreal doing an enormous business in old and new crop right up to the close of navigation.

A town cannot grow without business. By helping your local dealer you assist the community.

Hail Storms

Connection Between Hail Storms and Thunderstorms is Rapidly Shifting Degrees of Temperature.

The starting point of a hail storm is a layer of air laden with water-vapor. This passes rapidly through varying degrees of temperature, which first freeze the particles of water and then melt them and re-freeze them, adding other particles as the journey continues. Hail stones, in falling, are sometimes carried below the central part of the storm which gave birth to them, through successive layers of rain or snow, which accounts for the fact that the resultant stone is formed of a number of distinct coatings, like the skins of an onion. It frequently happens that a considerable quantity of this frozen vapor is whirled by the action of the storm into the centre of the tornado. Then, when the force ceases abruptly or the particles become too heavy to be supported by the wind, they fall to the earth in an almost solid mass. The connection between hail storms and thunderstorms is because of the rapidly shifting degrees of temperature which accompany the latter—a fact which also explains why hail storms occur usually in the spring or summer, when the majority of thunderstorms take place.

The Prince of Wales presents Boxing Shield to Jewish Lads' Brigade, Colonel Patterson receiving the medal.

Canadian Cattle Healthiest In World

Dominion's Envious Reputation Result of Untrifling Vigilance.

Efforts of the Dominion department of agriculture to obtain a clean bill of health for Canadian livestock have been unusually successful, it is asserted by officials of the department, and Canada is acknowledged all over the world, even by those persons in Great Britain and Ireland who favor the retention of the present embargo against Canadian store cattle, to be the healthiest of all countries for livestock. This enviable reputation is the result of years of patient effort and untiring vigilance.

No animal, alive or dead, and no product made from the carcass of an animal, may be shipped out of the Dominion without a certificate of the health of animals branch of the department of agriculture. These certificates, it is stated, have to be shown and verified both at points of departure and arrival. Canned goods, such as meats, fruit, vegetables, evaporated fruits, etc., are all subject to the same rigid inspection. Imported animals and foods have to run the gamut in the same way. Not only the articles themselves must be free from taint but also the factories, warehouses and stores from which they come. The cars, boats and other vehicles that

Wonder Microscope Aids Scientists In Studying Life History Of Bacteria

Gasoline Made At Fort Norman

The Most Northern Point in the World For That Process.

Gasoline is now being made at Fort Norman oil camp, far down the Mackenzie toward the Arctic, and at the most northern point in the world for that process. A message received by the Imperial Oil Company Limited, reported that operations were begun at Fort Norman well where oil was struck last August. From the gasoline made, a motor boat has been run five hundred miles to Fort Smith. Gasoline is being turned out at Fort Norman at the rate of thirty-five gallons per day.

Cocoanuts are the common form of exchange among the natives of Nicaragua. For instance, a box of matches is worth twenty cocoanuts, while for needles the price is one coconut each.

Dry Eyre, president of the Royal Microscopical Society, writes in the London Daily Mail on the possibilities of the new microscope devised by Mr. J. E. Barnard. It enables photography of the living bacillus, and Dr. Eyre, if certain conditions are confirmed, sees new possibilities opening up with this aid for the treatment of infective disease by serums and vaccines.

"With the life history of bacteria recorded by the wonder microscope, preventive and curative medicine may develop enormously, if not almost wholly, on these lines, and the use of drugs be restricted to the alleviation of symptoms.

"It also seems that, by detecting at an early stage that deposit of salts which causes the hardening of the arteries, the new microscope may enable us to check the onset of premature old age."

"Few diseases have made so immediate an appeal to the imagination as the sleeping sickness of West Africa," says the Times. "The passage of its victim through lethargy to drowsiness ever increasing, and finally to a death which no effort, in the majority of instances, has served to avert, holds a quality of dread at once strange and fascinating."

"Moreover, the fact that this disease is carried by a fly and caused by an organism of a type but recently recognized by science has added mystery to its other appeals. Immense efforts have been expended to elucidate its prevention and cure. So far as the latter is concerned, disappointment has been renewed on many occasions, drug after drug having failed to realize the expectations entertained concerning it. Happily, it would now appear that a new basis of hope has been supplied.

"Dr. Marshall, of Uganda, has just described at a meeting of the Society of Tropical Medicine and Hygiene a method of treatment the results of which, in his hands, can only be described as remarkable. This method has already saved some fifty lives."

Extension of Canada's Seed Trade

Growth of Export Business Owing to Efforts of Dominion Agricultural Dept.

During the year 1920 Canada's export seed trade made a considerable advance, owing in no small degree to the efforts of the Dominion Department of Agriculture and the Department of Trade and Commerce. The Canadian Trade Commissioners supplied lists of prospective customers abroad for Canadian seed. These were communicated with and their requirements placed before Canadian exporters. In this way an increased export of seeds was brought about to the United States, Great Britain, France and Newfoundland. To Ireland alone approximately 100,000 bushels of fibre flax seed, worth about \$1,000,000, was exported. In British Columbia, field root and garden vegetable seeds, amounting to 150,000 pounds, were marketed through the United Seed Growers, Limited, Penticton, B.C. Some 75,000 pounds of mangel, swede turnip, and field carrot seed, grown by the experimental farms, were sold at current wholesale prices to farmers' organizations and individual farmers. It was deemed advisable to confine the marketing of this seed to Canada, so that farmers might have the exclusive advantage of using this high quality seed. Circulars detailing the available seed potato supplies in Prince Edward Island, Nova Scotia, New Brunswick and Quebec proved an important factor in relieving the shortage in Ontario. Demonstrations conducted on 117 farms in Ontario and Quebec with mangel and swede turnip seed resulted in showing the superiority of home grown seed over foreign. Seed laboratories are now maintained by the Dominion Department of Agriculture at Ottawa, Winnipeg and Calgary, and at those points some 20,000 tests were carried out. Samples of wheat, oats, barley, timothy and clover were tested for vitality and at Calgary, investigation was made into the effect of frost on germination.

An unique industry in France is the making of wedding outfits. Not infrequently the clothes of all the participants in a wedding are hired for the occasion.

World Happenings Briefly Told

A shipment of Asiatic coal, the first to reach San Francisco in five years, arrived from Marquet, Manchuria.

Steamer Pere Marquette, which has been lying at a depth of 80 feet at the bottom of Lake Michigan, is to be raised.

Chas. F. Champlin was awarded the prize for the best loaf of bread at the Evanston, Ill., fair. He defeated 45 women entrants.

Six sisters whose combined age total 418 years are visiting relatives at Charlottesville, Va. The eldest is 80, the youngest 61.

There are approximately 330,000 Indians in the U.S. who speak 57 languages and two-thirds of whom cannot understand English.

Using a common buttonhook, burglars slipped the mechanism of a safe at the American Book Shop, Vancouver, and got away with \$1,800.

The Dominion livestock branch weekly cable from London states that there is a moderate demand for Canadian cattle in England.

From 5 to 25 per cent. wage reductions have taken place in the leading industries throughout Canada since the close of 1920.

A man eighty years old, of Milton, Ont., says he cannot remember when potato bugs were so numerous. They are in patches of Milton in millions and people are working day and night trying to destroy them.

Owing to the rapid increase of the school population of the city it has been found necessary to institute the "platoon system" in Calgary schools. When the fall term opens this plan will be adopted in two of Calgary's schools.

Pirate yachts and reports of mysterious ships seen lurking along the trade lanes of the North Atlantic, may be explained by the discovery of "blockade runners" that have been landing valuable cargoes of contraband liquor on the Jersey coast.

Mr. Lloyd George declares there is no truth in the report that King George had stepped in to untangle a complication between Great Britain and the United States over the proposed Pacific Conference, before the recent action by the Washington Government moving for the conference.

LOST 29 POUNDS DYSENTERY WAS THE CAUSE

Dysentery is one of the worst forms of bowel complaint, and hardly any other disease so quickly undermines the strength and brings about a condition of prostration and utter collapse that often terminate fatally.

To check the unnatural discharge without bringing on constipation you should use that grand old remedy with a reputation extending of 76 years.

DR. FOWLER'S EXTRACT OF WILD STRAWBERRY

Mr. G. H. McVagh, Mower, Sask. writes:—"About eight years ago I had a severe attack of dysentery. I was sick for three weeks. I weighed 154 lbs. when I took sick and 125 when I got it stopped. I think I tried every medicine on the market, but did not find relief until I used Dr. Fowler's Extract of Wild Strawberry, and one bottle did it. I think there is nothing like it for diarrhoea or dysentery. I always keep some on hand as a person does not know when he will need it." Price 50c a bottle; put up only by The T. Millburn Co., Limited, Toronto, Ont.

Novel Use For German Indemnity

Britain May Use Her Share to Help Overseas Settlers.

The parliamentary empire development committee is considering a novel scheme of overseas development. The proposal is that part of the indemnity which Britain is to receive from Germany should be placed in a fund out of which loans would be made to suitable men and families to enable them to settle in the overseas dominions. Next December, Great Britain will receive £550,000,000 worth of German bonds, and the idea is that £50,000,000 worth of these bonds should be guaranteed by the British Government and made the basis of advances to overseas settlers, such advances to be secured by mortgages on properties acquired and developed by the settlers.

Sentenced To Death.

No Appeal Possible. The death warrant is passed out every time a corn is treated with Putnam's Corn Extractor. It means the end of the corn. Putnam's lifts out corns, root and branch, and never fails. Refuse any substitute for Putnam's. 25c everywhere.

Blenheim Palace.

Blenheim Palace, the residence of the Duke of Marlborough, is one of the finest in England. There are one hundred and twenty rooms in the palace and fifteen staircases. It is stated that four thousand dollars' worth of putty is required every year to keep the window panes in repair.

PALE AND NERVOUS SCHOOL CHILDREN

Need Rich, Red Blood To Regain Health and Strength.

Many children start school in excellent health, but after a short time home work, examinations, hurried meals and crowded school rooms cause their blood to become weak, their nerves over-wrought and their color and spirits lost. It is a mistake to let matters drift when boys and girls show symptoms of nervousness or weak blood. They are almost sure to fall victims of St. Vitus Dance, or drift into debility that leads to other troubles. Regular meals, out-door exercises and plenty of sleep are necessary to combat the nervous wear of school life. But it is still more important that parents should pay attention to the school child's blood supply. Keep this rich and red by giving Dr. Williams' Pink Pills and the boy or girl will be sturdy and fit for school. The value of Dr. Williams' Pink Pills in cases of this kind is shown by the statement of Mrs. Watson, Grand Falls, N.B., who says: "In the spring of 1919 my daughter, Thistle, then 12 years of age, began to show symptoms of nervousness which developed into St. Vitus Dance. She seemed to lose control of her limbs and at times very much in her body seemed to be twitching and jerking, and the trouble seemed to be growing worse. We finally decided to give Dr. Williams' Pink Pills, and the result was better even than we had hoped for, and she is now enjoying the best of health. You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or by boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont."

Plan Your Vacation Trip

Special Summer Tourist Fares to the Pacific Coast.

Special Summer Tourist tickets to Vancouver, Victoria, Seattle and other Pacific Coast points are now on sale daily by the Canadian Pacific Railway. These tickets will bear a final return limit until October 31st, and permit stopovers en route, which gives travellers an opportunity of visiting some of the beautiful resorts in the Rockies, such as Banff, Lake Louise and Glacier, where the Company maintain splendid resort hotels. These tickets are optional via the main line or Arrow Lakes route in one or both directions without extra charge. No expensive side trips necessary.

In addition to the "Trans-Canada Limited" exclusive sleeping car train, a choice of two other daily trains is offered, and all are equipped with open-top observation cars through the mountains an excellent view of the magnificent scenery may be had.

Any Agent of the Canadian Pacific will be pleased to give further particulars and make the necessary arrangements for the trip.

Minard's Liniment for Burns, etc.

IS YOUR NOSE PLUGGED? HAVE YOU CATARRH?

If Subject to Colds, Here is Real Good Advice.

Don't load up your stomach with cough syrups, send healing medication through the nostrils. It is the passages that are subject to colds and Catarrh. Easy to do this with CATARRHOZONE. It helps a cold in ten minutes. Even to the lungs goes the healing vapor of Catarrhozone—all through the bronchial tubes, nostrils and air passages—everywhere a trace of disease remains will Catarrhozone follow. You'll not have colds, nor will you suffer from sniffles, bronchitis, or throat trouble if Catarrhozone is used. Get it today but beware of dangerous substitutes meant to deceive you for genuine Catarrhozone. Large size, two months treatment, costs \$1.00, small size 50c, sample size 25c, all dealers or the Catarrhozone Co., Montreal.

Placating The Crowd.

The British Government declares it is abandoning war subsidies to agriculture, which would amount to \$100,000,000 or \$150,000,000. But it is making a grant of \$3 per acre for wheat, and \$4 for oats this year, the cost of which will be between \$75,000,000 and \$175,000,000. This is one way of trying to placate the economy crowd.—Toronto Mail and Empire.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc. There Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Conditions Good in Germany

Are Hopeful of Paying Indemnity.

Says Canadian Officers. The German people are hopeful of being able to pay their war indemnity and indications are that they will be able to do so if given time, in the opinion of Major Spencer Relph, controller of the clearing office in Canada, which is handling enemy property and reparations.

Major Relph has just returned to Ottawa after spending some time in England and Germany. In regard to conditions in Germany, Major Relph stated that he found every evidence that all factories were running full blast all night and German agricultural prospects were excellent.

Oil Has More Steam Than Coal.

The amazing increase in the use of oil for fuel is not surprising when it is considered that, weight for weight and with proper burners, the oil gives 50 per cent. more steam than coal. It is easier than coal to handle, it obviates dust and dirt, makes little smoke and no ashes and can be lighted instantly and controlled absolutely.

Peevish, pale, restless and sickly children, their condition tormented by Mother Graves' Worm Expeller will relieve them and restore health.

Price Russia Has Paid.

Russia's loss of 12,000,000 population seems to be a big price to pay for a fantastic economic dream.—Chicago News.

CUTICURA HEALS BABY'S FACE Could Not Sleep Eruption Itched and Burned So.

"I noticed a little pimple on my baby's face. I thought it was from the sun but it kept getting worse and the skin was red and very hot. He could not sleep or rest the eruption itched and burned so, and it caused him to scratch. I was quite discouraged."

I saw an advertisement for Cuticura Soap and Ointment and sent for a five sample. I bought more and after using two cakes of Cuticura Soap and two and a half boxes of Cuticura Ointment my baby's face healed. (Signed) Mrs. S. D. McGuire, Clarkburg, Ont., Dec. 18, 1918.

See 25c. Cuticura Soap, Ointment and Talcum for every-day toilet purposes. See 25c. Cuticura 50c. and 50c. Sold everywhere. Write for full particulars. Cuticura Soap and Ointment made in Canada. Price 50c. a box or by mail at \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

W. N. U. 1378

A Tennis Frock Of Striped Silk

By Marie Belmont.

Heavy crepe de chine is an admirable silk for the summer sport frock. While the plain weaves may be had in many very lovely colors the striped silk can be developed in most attractive modes. An excellent quality of crepe de chine is chosen for the model illustrated. It has a cream ground, which is broken at regular intervals by stripes of blue and gold. On skirt and blouse, which is cut with kimono sleeves, the stripes are horizontal. Bands of the silk with the stripes running vertically extend from shoulders to hem and give a touch of distinction to the dress. The tie is made of blue silk.

Mild Epidemic Going Round.

It is due to impurities in the water, cramps, diarrhoea, headache. Those who take twenty drops of Ner-viline in sweetened water usually get quick relief. It is really wonderful how good old Ner-viline does up a sour stomach, how it stops hiccoughs, how quickly it puts a stop to those nasty attacks of gas. Every home should keep a bottle or two of trusty old Ner-viline on hand. 35 cents everywhere.

Travel A Good Investment

Get Away For A Vacation And See The Signs.

In every person's life at some time or other there comes a feeling of utter exhaustion or, as many say, "Fed up" with a general lack of interest in the everyday surroundings. Hard work is as a rule blamed for this condition, and little is done to remedy it until too late and the family physician is called. Work may be to a certain extent responsible for this condition, but the chief reason is the lack of a change, a relaxation of the mind. Get away for a few weeks vacation, see new sights and enjoy the rest of the world life. Enjoy a change of climate. There are thousands of interesting places in Canada which may be enjoyed either winter or summer, and within easy reach via the Canadian Pacific Railway.

A trip at any season of the year will prove a good investment and send you back with renewed vigor, broaden your mind and wiser from the knowledge gained. A postal card to any Canadian Pacific Agent will bring you literature and any information desired.

Going Down.

A Scotchman who was notorious as a skeptic had erected a massive mausoleum for his final rest and one day he observed an elder of the kirk gazing at it.

"Strong place that, hey David?" he said. "I'll tak a mon some time tae raise up oot o' that at the day o' judgment."

"Hoot, mon," said David, "ye can gie yerse a little fash about rairin when that day comes. They'll tak the bottom 'oot o' it and let ye fa' doon."—Boston Transcript.

Canada's Outlook Is Bright

News That Hushes the Howls of the Pessimist.

"Splendid crops all over Canada" is the news that flashed from the Department of Agriculture at Ottawa.

It is news that hushes the howls of the pessimist and kindles anew the confidence every true Canadian has in his country.

The years following the war have been pointed to as the years of Canadian expansion, and now that the after-war unrest is settling. Nature has turned in to get this young nation off to a flying start.—Toronto Telegram.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them more than when they are in good health. The fact proves that while Catarrh is a local disease, it is not a local one. It is a general condition. HALL'S CATARRH MEDICINE is a Tissue Solvent, Purifier, and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and restoring normal conditions. All druggists. Circulars free. R. J. Casey & Co., Toledo, Ohio.

Bricks Reduced In Price.

The Brick Manufacturers of the province of Manitoba have unanimously agreed to a reduction of \$1.50 per thousand of bricks, to take effect as from the 1st July.

O. McPherson, Furniture Dealer and Undertaker, Armstrong, B. C. Minard's Liniment Co., Ltd., Vancouver, B. C.

Dear Sirs—Since the start of the Baseball season we have been treated with sore muscles, sprained ankles, etc., but just as soon as we get a little relief from our troubles ended. Every baseball player should keep a bottle of this liniment handy.

Yours truly, W. E. McPHERSON, Secretary Armstrong High School, Baseball Team.

A Monster Sturgeon.

One of the largest sturgeon ever sold was caught recently by William Gooshead, a Berens River Indian, fishing at Pigeon Bay, Lake Winnipeg. Helgi Einarsson, the buyer, said it was the biggest he had ever seen. Its weight was 190 pounds. Dressed it tipped the scales at 120. The head alone weighed 27 pounds. Its length was eight feet six inches and circumference four feet three inches.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

For Civic Housing.

The Civic Housing Commission of Winnipeg has given up to the 1st July, 160 loans, aggregating \$850,000, for home building purposes. This is an increase of \$50,000 over the entire building plan for last season.

TO WOMEN OF MIDDLE AGE

This Woman's Letter Tells You How To Pass The Crisis Safely.

Lascelles, P.Q.—"During the Change of Life I felt so weak and run down I could hardly do my work. The perspiration would pour over my face so that I couldn't see what I was doing. We live on a farm, so there is lots to do, but many who felt as I did would have been in bed. I took Lydia E. Pinkham's Vegetable Compound and it did me a world of good. I tried other remedies but I put Vegetables Compound ahead of them all, and I tell every one I know how much good it has done me." Mrs. DUNCAN BROWN, Lascelles, Prov. Quebec.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, nervousness, palpitations of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and dizziness should be heeded by middle-aged women, and let Lydia E. Pinkham's Vegetable Compound carry them safely through this crisis as it did Mrs. Brown.

You are invited to write for free advice. No other medicine has been so successful in relieving women's suffering as Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass.

ATLAS LUMBER Co'y. BUILD IT NOW

Reconstruct the Old Home For Longer Usefulness

Reconstruction begins at home. If the old house isn't all you desire, and you can't build a new one, a little of the right kind of repairing and remodeling will readily restore it to present day standards.

Perhaps it's a new porch, a summer kitchen, a side entrance, a new roof, extra rooms in the attic or a renewing of old, cracked walls and ceilings that is needed.

The right kind of lumber used in the right way will make the change and we have all the material you will require including that knotty and crackless manufactured lumber Deaver Board, for better walls and ceilings.

Suppose you ask us about it?

Cinnamon Rolls 3rd
Jellied Chicken 3rd

3 yr-old Clydesdale Filly Pure Bred 1st
2 yr-old Ayrshire Bull Pure Bred 1st

The schoolhouse at Elba was packed last Sunday afternoon for the Sunday School and Preaching Service there, every seat being taken. This is an evidence of the increasing interest. The next date of meeting is Sunday, August 14th, at 3 p. m.

A good time is assured to all who attend the Dance in the New Hall, at Sampsonston, Friday, August 5th.

Misses Isobel and Helen Willis are visiting relatives at Bowden for a few days.

Let's revive the old Town Band and each and all do our little "bit" to make it what it ought to be.

Mrs. G. T. Oyler and children are visiting with relatives at Innisfail for a time.

There was an unusually large attendance at the Inverlea Ladies Aid meeting, held on Tuesday afternoon of this week, at the home of Mrs. F. Collicutt. The trees and garden looked very attractive, and a very pleasant, friendly time was enjoyed by all.

Several of the local Trail Rangers proceeded to Sylvan Lake on Wednesday last. Rev. R. K. Swenerton accompanied the boys, who will spend a week or so in camp.

Crossfield win Baseball Tournament

Crossfield beat Didsbury in the final game of the baseball tournament played on the Fair Grounds on Wednesday evening. The score was 17 to 15. Pineo, who set back Airdrie in the first game on Monday, July 25th, proved too good for the Didsbury sluggers. Williams relieved Pineo on the mound for the ninth inning, Ableman, Smart and Miner were the outstanding stars for Crossfield.

Batteries — Didsbury: Studer, Keith and Herman.
Crossfield: Pineo, Williams and Ableman.
There was quite a large crowd to witness the above game, Airdrie, Carstairs and Didsbury being well represented.
